# SWPlug Payment Gateway For WHMCS

1. Installation and configuration

1.1. In order to install SWPlug payment gateway get package from Files tab and unpack it.
1.2. Move files to your server.
1.3. Log in to WHMCS Admin Area and open Setup → Payments → Payment Gateways tab.
1.4. Choose *All Payment Gateways* tab and find SWPlug gateway on the list.
1.5. After activation of gateway, move to *Manage Existing Gateways* tab and fill in configuration form.

Sample configuration is shown in the following picture.

1.6. Set *whmcs_directory/modules/gateways/SWPlug/App/cron.php* file as a cron task with fifteen minutes frequency.

'whmcs_directory' is an absolute path to directory where WHMCS files are.

Notice! You can update some langs used in SWPlug custom page by changing them in */modules/gateways/SWPlug/App/langs.php* file.

Content of that file is following:

```
$swPlugLangs = [
    'invoice_details_header' => "Invoice Details",
    'invoice_id' => "#",
    'invoice_date' => "Date",
    'invoice_total' => "Total Amount",
```

```
    'invoice_paymentmethod' => "Payment Method"
];
```

Assume, you want to change lang 'Date' to 'Date of Invoice Creation'. In order to do so, just change following line

 'invoice_date' => "Date",

to

 'invoice_date' => "Date of Invoice Creation",

and save changes.

2. Making payment with SWPlug gateway.

2.1. Order product at Client Area side.

2.2. After choosing SWPlug payment method you will be redirected to SWPlug custom page, where you can see invoice details and instruction, what you have to do in order to handle payment.

See the following picture.

Invoice Details

#	5
Date	03/09/2019
Paid Amount	0.00 USD
Total Amount	6.00 USD
Payment Method	SWPlug

STELLAR INSTRUCTIONS

Thank you - your order is now pending payment.

Send exactly 94.8192349 XLM with the memo tag 2838023a778dfaecdc212708f721 to:

GA4UEGK6MQMWPUZHPPD3FO7BSTYM3NXKGKBU6RYBJVQNGGYBWYSNZ

After you have completed payment and the transaction has cleared, you will be redirected to invoice page.

2.3. After making payment, invoice will be marked as Paid and you will be redirected to invoice view.
If you close that page before you pay, cron task which you set will mark invoice as paid.
